

# CLASS A KITS

## LEVEL 2: FULL ELECTRIC POWER

### Performance:

For the true RV enthusiast making frequent trips to off-grid sites, tailgating or touring, the Full Electric Power kit is a great fit. With enough juice to run 2 A/C units, fridge and all basic appliances for hours without a generator, you can enjoy the comfort of home virtually anywhere. The system can be charged from shore, generator or while driving from an included high-output alternator.

### Environmentally Friendly:

Reduce your impact on natural spaces by enjoying your RV with fewer emissions and without the disruption of a noisy generator. What's more, the system's powerful charger and fast-charge acceptance make it a good fit for optional solar charging.

### OBJECTIVES:

- One air conditioner overnight\*
- Power two A/C's, fridge, and all basic appliances
- Simple integration
- Medium cost to entry

### VALUE:

- Hours of quiet, off-grid time
- Full electric (eliminates propane)
- Environmentally friendly, reduces emissions
- Equivalent to ~37 Group31 lead acid @ 50% DOD
- 1/6th the weight to lead equivalent
- 10+ year life expectancy
- 10 times faster charge rate
- 3-year warranty
- Eliminate generator or reduce size by 50%
- More bay space
- Data can be displayed with any Multiplex system
- Can be stored in cold climates

### SYSTEM INCLUDES:

- 20.2 kWh VSP pack
- Junction box with charge request PLC
- Two 3600 Watt Pure Sine inverter chargers w/ display
- CAN J1939 output
- 10,000 W engine generation w/ controller
- 40 amp 12V power supply
- Complete wiring harness
- SOC gauge
- Remote lighted on/off button
- O C heating pad and control box
